## ENVIRONMENTAL POLICY

---

Mega Pak Zimbabwe is the leading plastic packaging manufacturer in the country. The Company undertakes to conserve natural resources in the conduct of its business and to prevent the pollution arising from its business activities.

Electricity, liquid paraffin, diesel and LPG Gas constitute the main sources of power for the Company. Power back-up generators are also used and these, together with compressors, are a major source of noise in the factories.

The Company therefore, commits as follows:-

- To comply to all applicable legislation and other regulatory requirements, as well as approved codes of practice and adopted packaging sector requirements
- To formulate environmental management systems for purposes of identifying, controlling and monitoring environmental aspects arising from the business operations. Significant environmental aspect include electricity and water consumption, generation of post-consumer PET waste, oil leakages, noise production and use of liquid fuel.
- To establish measurable environmental objectives with quantifiable targets and review them for continual improvement in order to adequately protect the environment.
- To communicate and consult with contractors and other interested parties our environmental issues. The Company shall establish partnerships to ensure that the down-stream effects of its products are minimized.

W. Dangarembizi
