ENVIRONMENTAL POLICY

Mega Pak Zimbabwe is the leading plastic packaging manufacturer in the country. The Company undertakes to conserve natural resources in the conduct of its business, protect the environment and to prevent the pollution arising from its business activities.

The policy is applicable to all areas of our business and has been implemented to meet requirements of the ISO 14001:2015. In pursuit of our vision and mission, risk based thinking forms an integral part of our planning and decision making process.

The Company therefore, commits as follows:-

- Fulfilling all our compliance obligations and expectations of our interested parties.
- Establishing measurable objectives and periodically review our Environmental Management System for continual improvement.
- Consideration of environmental issues in all our business strategies and initiatives, including sustainable resource use, climate change, protection of biodiversity and ecosystems.
- Zero harm to the environment and community through environmental risk management programs.
- Educating, training and motivating employees and contractors in relation to their environmental management responsibilities.
- Communicating and making policy available to all interested parties, employees and public through selected media so that they are aware of our requirements in environmental risk management.
